

Financial Performance & Variance Analysis Dashboard

Overview

This project delivers an **executive-level financial analytics dashboard** designed to support **budget vs actual analysis, variance diagnostics, and trend monitoring**. The solution enables finance leadership to rapidly identify performance gaps, understand variance drivers, and take timely corrective action.

Business Objectives

- Track **Actual vs Budget** performance at enterprise level
- Identify **key variance drivers** across accounts, entities, and time
- Monitor **month-over-month and rolling trends**
- Provide **audit-ready, drill-down financial reporting**

Dashboard Structure

Page 1 – Executive Financial Overview

Audience: CFO, Finance Leadership

Key Business Questions

- Are we ahead or behind budget?
- Which sections drive financial variance?
- Is performance improving over time?
- Are expenses under control?

Visual Components

- **KPI Cards:**
 - Actual

- Budget
- Variance
- Variance %
- **Line Chart:** Actual vs Budget by Month
- **Waterfall Chart:** Variance by Financial Section
- **Financial Matrix:**
 - Rows: Statement → Section → Subsection
 - Columns: Actual | Budget | Variance | Variance %

Page 2 – Variance Drivers & Trends

Audience: FP&A, Operations Leadership

Key Business Questions

- Which accounts are underperforming?
- Which entities contribute most to unfavorable variance?
- Are trends improving MoM / YoY?
- Where should management intervene?

Visual Components

- **Bar / Waterfall Chart:** Variance by Account
- **Column / Waterfall Chart:** Variance by Entity
- **Line Chart:** Rolling 12-Month Actuals (MRR)
- **Heatmap / Conditional Matrix:** Variance Status by Month

Key Insights Enabled

- Rapid identification of **cost overruns**
- Early detection of **revenue shortfalls**
- Clear **time-based performance trends**
- Executive-ready, **actionable insights**
- Clean **audit trail and financial transparency**

Sample Analytical Insights

- Actuals exceeded budget by **+171%**, signaling strong revenue performance
- Budget targets exceeded expectations despite flat monthly budget allocation
- Expense and revenue variances reconciled to zero at total level, validating model integrity
- Marketing, COGS, and Operating Expenses identified as **primary variance drivers**
- UK and Germany identified as **top-contributing entities to variance**
- Rolling 12-month MRR trend shows growth stabilization around **0.7M**

Tools & Techniques

- Power BI
- DAX (Variance %, Rolling 12M, Financial KPIs)
- Dimensional financial modeling
- Executive-focused dashboard design
- Variance & trend analysis
